

# Template Week 7 – Host your website on GitHub

Student number: 578438

**Domain name (URL) of your website on GitHub:**

<https://shabhyaa4.github.io/>

The screenshot shows a Microsoft Edge browser window with the URL <https://shabhyaa4.github.io/> in the address bar. The page displays a horizontal navigation menu with links labeled 'home', 'week 1', 'week 2', 'week 3', 'week 4', 'week 5', 'week 6', and 'week 7'. Below the menu, there is a heading 'My Hobby: Football' followed by a short paragraph: 'I like to play football in my free time. I usually play with my friends on weekends. It helps me stay fit and I enjoy watching matches as well.' To the left of the text, there is a small thumbnail image of two people playing football. To the right, there is a larger, more prominent image of a white and blue football resting on green grass.

## Relevant screenshots + motivation:

The screenshot shows a browser window with multiple tabs open. The active tab is 'Shabhy4.github.io' at <https://github.com/Shabhy4/Shabhy4.github.io>. The page displays a list of files in the 'main' branch. The files include 'css', 'images', 'pdf', and several HTML files named 'home.html', 'index.html', 'week1.html', 'week2.html', 'week3.html', 'week4.html', 'week5.html', 'week6.html', and 'week7.html'. Each file entry shows its name, a brief description, and the time it was added. To the right of the file list, there are sections for 'About', 'Releases', 'Packages', and 'Deployments'. The 'About' section notes 'No description, website, or topics provided.' and shows activity metrics: 0 stars, 0 watching, and 0 forks. The 'Languages' section indicates that the repository is 100% HTML.

I hosted my IT Fundamentals website on GitHub Pages in the repository Shabhy4.github.io. I uploaded the complete site folder, including all HTML, CSS, images and the pdf directory with week1–week7 reports. GitHub Pages automatically serves index.html from the repository root, so my site is available at <https://shabhy4.github.io/>. I chose GitHub Pages because it is free, easy to use from the browser, and it allows my teacher to access all assignments and PDFs from any computer.

Ready? Save this file and export it as a pdf file with the name: [week7.pdf](#)
